

VAG IMMO3 PIN CODE READER

Using this device you can read the security Login Code for VAG Cars by simply click the button "immo3" (click & play), It works on VAG cars that have been made since +/- June 2000 to year 2004 which are with **Immobiliser System III**.

Cars models before year 2000 used an older immobiliser system where a Login Code is not integrated in Engine ECU. These old model cars also need a Login Code to program new keys, but in that case you need another [Login Code Reader](#) where a Login Code can be simply read from Instrument Cluster.

Codes from some car models after June 2000 can be read from Instrument Cluster too, but some Instrument Clusters are very hard to access and to read, or they must be scanned before getting access to the Cluster. It will take too much time and sometimes it is impossible i.e. Audi A4-2001+ (All remaining by OBD.)

In such cases we have another solution. We can read out the Login Code via OBD from Engine ECU. This Login Code in Engine ECU is the same as the Login Code in Instrument Cluster.

With this device you can read the security Login Code for VAG Cars since at +/-June 2000 till 2004 with BOSCH ECU's EDC15/ME7.1/ME7.1.1/ME7.5. These ECU's are in the most engines of VAG Concern for VAG cars in +/-June 2000 till 2004.

Everything is based on **K-Line** Diagnostic for VAG cars, so it doesn't work on CAN BUS Diagnostic VAGs, i.e. Golf-5, Touareg, etc.
